

# MALT SPROUTS

**The best of malt house**

Protein-stimulating feed material  
with specific protein, mineral, vitamin, enzyme  
and aromatic content.

# MALT SPROUTS

## COMPOSITION

Malt Sprouts are a feed material obtained from germinated malted barley. It contains roots and sprouts, as well as a fine proportion of cereals, husks and small grains of malt.

## ADVANTAGES

- Non-GMO Feed
- Economical protein and energy source with high NDF content
- High content of essential amino acids, especially lysine, methionine, cystine, tryptophan, threonine
- Source of A1, A2, B1, B2, B6, C, D and E vitamins, pantothenic acid, nicotinic acid, nicotinamide, biotin, inositol, p-aminobenzoic acid, Lactobacil casei factor, rhizopterin. Organic acids such as malic, aspartic, succinic, acetic, propionic, citric and higher fatty acids, polyethanes, cholesterolin, oily substances, resins, waxes and sugars.
- Contains proteolytic and amylolytic enzymes
- Source of minerals, especially phosphorus P
- Especially suitable for stimulating dairy cows during lactation (not more than 10-15% of daily dry matter dose) and for sows
- Dietary feed for direct feeding into compound feed for dairy cows, pigs and other farm animals
- Tasty feed with an aromatic effect
- Promotes intake of other feeds

## USE AND APPLICATION

For direct feeding in compound feed for ruminants, horses, pigs and poultry.

## RECOMMENDED DOSAGE

Dairy cows	1.5 - 2.5 kg / pc
Young cattle up to 1 year	0.5 - 1.0 kg / pc
Young cattle over 1 year	1.0 - 2.0 kg / pc
Calves	0.25 - 0.5 kg / pc
Horses	1.0 - 2.0 kg / pc
Pigs 20 - 50 kg	0.2 - 0.3 kg / pc
Pigs 50 - 100 kg	0.3 - 0.5 kg / pc
Sows	0.25 - 0.75 kg / pc

## FORM

Pellets, Bulk
